Syeda Tooba Hasnain

Full Stack Developer · AI Integration · React / Node.js
Augsburg, Germany · +49 163 1465933 · toobadeutsch@gmail.com
tooba-ai-beta.vercel.app · GitHub · LinkedIn

Profile

I am a Full Stack Developer with 3+ years of professional experience shipping web applications and AI-powered tools to real users. I build things end-to-end. React frontends, Node.js backends, REST APIs, and LLM integrations and I care about code that actually works in production, not just in demos. I pick things up fast, work independently, and I am genuinely excited about what AI is making possible right now. Currently in my 2nd semester of B.Sc. International Information Systems at TH Augsburg.

Technical Skills

Strong: React · JavaScript (ES6+) · PHP · HTML5 · CSS3 · REST API design · Git
AI & LLMs: OpenAI API · Gemini API · Prompt Engineering · LLM integration · RAG concepts
Backend: Node.js · Express · REST API architecture
CMS & E-Commerce: WordPress · WooCommerce · Shopify · Liquid
Learning: Next.js · TypeScript · Supabase
Languages: English B2 · German A2 (actively improving) · Urdu (native)

Projects

tooba.ai – Personal AI Portfolio

Next.js · TypeScript · Gemini API · Vercel | tooba-ai-beta.vercel.app

- Built a conversational AI portfolio that answers questions about my skills, experience and projects in real time, you are reading the CV it links to
- Designed and built the full UI, chat interface, and AI integration independently

AI Workflow Builder – Automation Platform

React · React Flow · Node.js · Express · Gemini API | ai-workflow-builder-q87o.vercel.app

- Users describe a workflow in plain text, AI generates a visual step-by-step automation plan with interactive drag-and-drop nodes
- Full-stack: React frontend on Vercel, Node.js/Express backend on Render, connected via REST API

Experience

Full Stack Developer (Volunteer) · Insides – Early Stage Startup *04/2026 – present*

- Contributing to web application and AI chatbot development for an Augsburg-based startup applying for EXIST government funding
- Advising on technical architecture and system design, React, Node.js, OpenAI API stack

Full Stack Developer · Corsys Limited *07/2023 – 09/2025*

- Built and maintained React frontends, PHP backends and REST API integrations for multiple live client projects
- Integrated OpenAI API into a live production platform and designed the full AI pipeline from user input to rendered output

Web Developer · International Technology Exchanger *06/2021 – 06/2023*

- Built and maintained WordPress, WooCommerce and Shopify stores for multiple clients, independent delivery, direct client communication

Education

B.Sc. International Information Systems *10/2025 – ongoing*

Developing strong foundations in object-oriented programming, algorithms, and software engineering principles. Gaining understanding of how businesses operate digitally including accounting, information systems, and process logic which directly informs how I build practical, real-world solutions.

Associate Degree, Computer Science *10/2022 – 02/2025*

Advanced Diploma, Software Engineering *2021*

Events & Activities

- Rocketeer Festival 2026 — startup & innovation event, Augsburg
- PROCOM ’22 – Project Exhibition — national-level tech competition, FAST University
- APTECH Vision – Grand Finale, national software showcase

What I am Like to Work With

I figure things out, when I get stuck I dig in rather than wait for someone to unblock me. I ship things that work rather than perfect things that never launch. I ask questions when I need to and stay quiet when I don't. I take feedback well because I care more about the result than being right. I work best in small teams where everyone has real ownership. Outside of code I am curious about language, design, and how systems works technical or human actually work.

Availability

Available immediately · up to 20 hrs/week · Augsburg based · Munich commutable · Remote friendly · Valid German student work permit
